SKILLS

Software Development

HTML, CSS, Javascript, jQuery, React, Node.js, ExpressRuby, Axios, Ruby on Rails, Git, Github, SQL, PostgreSQL

Advanced customer service skills.

Communication skills

Problem Solving skills

Vinyl

Full stack app, back end is powered by Ruby on Rails and the front-end is powered by React. The app is full-CRUD and includes user Authentication and Authorization.

PC-Culture

This is a full stack group project. It was created using Express, MongoDB, and React.

Are-Ya-Da-Leagues

This app does have full crud functionality, it was made using Airtable for the back-end and React for the front-end.

Are-Ya-Da-Weather

My very first project. I used vanilla javascript and used an API for the information and functionalized AXIOS calls.

AWARDS

Signature Partner

Was selected as the signature partner of the month after receiving my promotion.

Partner Of The Month Award/December/2021

Was selected as the partner of the month.

Partner Of The Month Award/April/2021

Was selected as the partner of the month.

Partner Of The Month Award/July/2020

Was selected as the partner of the month.

Partner Of The Month Award/October/2019

Was selected as the partner of the month.

Experience

H-E-B Grocery Company, LP Checker 12/2018 – 01/2020

For over a year I was part of an exciting and new checker team at a grocery store. I had the opportunity to work with many partners and meet a lot of people and work on my communication skills while improving my team work. I worked with customers, while staying attentive to their needs, yet maintaining composure in high-stress situations.

H-E-B Grocery Company, LP Service Lead 12/2018 – 01/2020

After working for a year as a checker, I was made a team lead. I had the opportunity to work with about thirty Partners. As a Service Lead, I was able to assist in leading a successful operation of the Central Checkout Department. I had the opportunity to train and coach to create a team environment where Partners work toward providing Customers consistently superior Customer Service. I was also in charge of onboarding new Partners. I also served as backup to the department manager. Troubleshooting equipment / technology (e.g., POS, coupons, self-checkout, eComm) was also a big part of my role.

Software Engineering Fellow 04/2021 – 07/2021

Created fully responsive front end web applications using HTML, CSS, Javascript, React, and third-party API integrations. Developed full-stack applications and designed REST APIs with full CRUD functionality using React, Javascript, Node.js, Express, Sequelize, PostgreSQL, and Ruby on Rails.

Managed team-based projects using agile workflow, Git version control and Github Applied knowledge of key languages and computer science.

EDUCATION

General Assembly, Software Engineering Immersive, Certificate of Completion

Austin Community College, Computer Science major

McCallum High School, Diploma
